1. The Amendment filed on February 15, 2007 has been entered.
2. Claims 1-6 are allowed.

The following is an examiner's statement of reasons for allowance: the Examiner agrees with the Applicant that the closest prior art Hockney et al. (US Patent No. 6,262,505 B1) does not teach or suggest the new limitation "an actuator assembly (350) disposed within the housing assembly (112) and configured, in response to commands supplied thereto, to selectively move the one or more auxiliary bearing assemblies (110) into and out of contact with the shaft (103)" (reference character added) in claim 1. The support for the instant amendment is found in, e.g., paragraph [0024] of the specification. Although Hockney teaches the magnetic actuator in column 6, lines 13-24, however, Hockney's actuator does not function as recited in Applicant's claim 1. See *Collaboration Properties Inc. v. Tandberg ASA*, 81 USPQ2d 1530, 1536 (N.D. Cal. 2006) (the term "configured to" constitutes a functional limitation).

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

3. The drawings were received on February 15, 2007. The Examiner accepts these drawings.
4. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure: Gabrys (flywheel 171 and bearings 176 and 179).
